SKILLS

Kotlin

Java

Swift

Objective-C

Flutter

Dart

Codemagic

Github CI/CD

Git

Database (MySQL,
MongoDB, Postgresql)

AWS

Firebase

PROFILE

Senior Software Engineer with 11 years of experience building high-quality mobile and backend systems. Skilled in native **Android (Kotlin/Java)** and **iOS (Swift/Objective-C)**, modern architectures (**MVVM**), and **TDD**. Experienced in **Kotlin Multiplatform (KMP)** for cross-platform code sharing and **Jetpack Compose** for responsive, maintainable Android UIs. Passionate about delivering scalable, performant solutions and exceptional user experiences.

★ TECHNICAL SKILLS

- **Android Development** : Expert in native Android development using Kotlin and Java, KMP, Jetpack Compose, MVVM architecture and TDD.
- **iOS Development** : Proficient in native iOS development using Swift and Objective-C.
- **Cross-Platform** : Extensive experience building applications with Flutter and Dart.
- **Backend & Frameworks** : Skilled in backend engineering using the .NET Framework
- **Cloud & Infrastructure** : Experienced in deploying and managing solutions on AWS and Firebase.
- **Databases** : Proficient in NoSQL and Relational databases, including MongoDB and PostgreSQL.
- **Tools & Architecture** : Focused on Clean Architecture, Git, CI/CD, Codemagic and security best practices.

📁 EMPLOYMENT HISTORY

Senior Software Engineer at Seesharp Solutions Sdn. Bhd., Kuala Lumpur

October 2017 — Present

- **Technical Leadership**: Spearheaded full-stack development initiatives and mentored junior developers in clean code practices and architecture.
- **Strategic Collaboration**: Partnered with product teams to translate complex business requirements for portfolio management, analytics, and risk modules into technical solutions.
- **System Optimization**: Engineered software updates and alterations based on rigorous design specifications to ensure long-term maintainability.
- **Full-Stack Development**: Leveraged modern cloud, mobile, and web technologies to solve complex architectural problems.
- **Stakeholder Communications**: Presented technical findings and solutions to senior executives and stakeholders, bridging technical execution and business value.

Software Engineer at Seesharp Solutions Sdn. Bhd., Kuala Lumpur

October 2014 — October 2017

- **System Maintenance**: Diagnosed and resolved complex system bugs to enhance application stability.

LANGUAGES

English

Malay

HOBBIES

- Contributing to open-source projects, developing personal mobile apps, and exploring new programming languages.

- **Module Development:** Implemented and modernized application modules under the direction of senior engineering leadership.
- **Team Collaboration:** Contributed as an effective collaborator within agile teams while maintaining independence on critical development tasks.
- **Quality Assurance:** Developed and executed automated testing protocols to validate complex features routinely.

EDUCATION

Bachelor of Computer Science (Hons.) Netcentric, MARA Technological University, Sungai Petani, Kedah

October 2011 — September 2014

Graduated with first class - CGPA 3.64

Diploma in Computer Science, MARA Technological University, Segamat, Johor

March 2009 — September 2011

Graduated with CGPA 3.33

HIGHLIGHTED PROJECTS

Kopen Kiosk

December 2025

- Developed a prison kiosk app to control purchasing of approved goods while ensuring security, compliance, and a seamless user experience within a restricted environment
- Integrated fingerprint scanning to identify inmates and authorize transactions.
- Built on **Kotlin Multiplatform (KMP)** with **Jetpack Compose** for shared UI

myKasih

April 2025

- Developed myKasih (Android/iOS), an app designed for recipients of MyKasih Welfare Programmes to view their wallet balance, transaction history, and program details.
- Integrated bar code scanner to check for products eligibility.
- Built on **Flutter** with provider for state management
- Achieved over 3 million downloads on both platforms, serving a diverse user base nationwide.

[MyKasih - Apps on Google Play](#)

myTNB

July 2024

- Contributed to migrating the discontinued myTNB **Xamarin** app to **.NET for Android**, enabling continued support and modernization of the platform.
- Assisted in refactoring existing features for the myTNB Huawei app, replacing Google Mobile Services (GMS) with Huawei Mobile Services (HMS) to ensure full compatibility with Huawei devices.
- Collaborated closely with QA and product teams to validate functionality across multiple Android devices and OS versions.

[myTNB - Apps on Google Play](#)

SimeDarby Attendance

October 2023

- Translated UI designs into functional screens and implemented features for the SimeDarby Attendance application using **Kotlin** and **Java** for native Android experience.
- Incorporated caching mechanism and offline capability to ensure app can be operated in rural area.
- Optimized app performance by reducing load times and memory usage, ensuring a responsive experience even on lower-end devices.

Midyson

May 2025

- Developed native Midyson app using **Kotlin** and **Java**
- Adopted **MVVM** architecture and modular design (data, domain, presentation) for cleaner, more organized, and maintainable codebase.
- Implemented a booking system within the app, enabling users to schedule and manage appointments efficiently.
